

# CHECKLIST ENVIRONMENTAL ASSESSMENT

Project Name: Land Breaking of tame grass, former conservation reserve program acreage for conversion to dryland agriculture. State of Montana Lease Number 8376.

Proposed Implementation Date: Fall 2011

Proponent: Brian and Martie Simonson RT 1 Box 1269, Plentywood, Montana 59254

Type and Purpose of Action: Surface lessees, Brian and Martie Simonson have made a written request for breaking of tame grass on former conservation reserve program acreage to the Glasgow Unit Office of the Department of Natural Resources & Conservation. The surface lessee has requested permission to break an estimated 127.2 acres of crested wheatgrass currently listed as conservation reserve program acreage. The land breaking would be a conversion from present use of tame grass conservation reserve program acreage to dryland agriculture for the purpose of growing small grain or pulse crops. The acreage would be reclassified from conservation reserve program acreage to dryland agriculture.

Location: E2NW4,, Section 22 Township 35 North Range 55 East, NE4NE4, SW4NE4, SE4SE4, Section 21 Township 35 North Range 55 East, W2NW4, SE4NW4, E2NE4, NE4SW4, Section 28 Township 35 North Range 55 East

County: Sheridan

## I. PROJECT DEVELOPMENT

1. PUBLIC INVOLVEMENT, AGENCIES, GROUPS OR INDIVIDUALS CONTACTED: Provide a brief chronology of the scoping and ongoing involvement for this project.

Brian and Martie Simonson the surface lessee have made a request to break 127.2 acres (more or less) of crested wheatgrass conservation reserve program acreage on State land Lease Number 8376. The request was sent to the Department of Natural Resources and Conservation, Glasgow Unit Office for review and evaluation. The request will be reviewed per Department of Natural Resources and Conservation land breaking criteria for all lands other than native sod. The Glasgow Unit Office contacted the following government agency for comments: Montana Fish Wildlife and Parks, Region 6.

2. OTHER GOVERNMENTAL AGENCIES WITH JURISDICTION, LIST OF PERMITS NEEDED:

The other government agencies that may have jurisdiction for this project are the United States Department of Agriculture, Farm Service Agency and United States Department of Agriculture, Department of Natural Resources and Conservation Service.

3. ALTERNATIVES CONSIDERED:

No Action Alternative: Deny permission to the surface lessee to break 127.2 acres of former crested wheatgrass rangeland. The new land use will be dryland agriculture to produce small grain & pulse crops.

Action Alternative: Grant permission to the surface lessee to break 127.2 acres of crested wheatgrass rangeland. The new land use will be dryland agriculture to produce small grain & pulse crops.

II. IMPACTS ON THE PHYSICAL ENVIRONMENT	
RESOURCE	POTENTIAL IMPACTS
<p>4. GEOLOGY AND SOIL QUALITY, STABILITY AND MOISTURE: Are fragile, compactible or unstable soils present? Are there unusual geologic features? Are there special reclamation considerations?</p>	<p>No Action Alternative: The soils on the State land will remain the same and continue to produce crested wheatgrass vegetation. The area will continue to produce vegetation for livestock grazing.</p> <p>Action Alternative: This type of project will impact the soils that are currently producing crested wheatgrass vegetation. The soils will be broken up for the purpose of producing dryland small grain and pulse crops. The soil type that will be broken for dryland agriculture is: Williams loam undalting, 0 to 4% slopes. The Williams loam is suitable for dryland agriculture. This soil type has minimal hazard of soil blowing. Manning coarse sandy loam 0 to 6% slopes. The Manning coarse sandy loam is suitable for dryland agriculture. This soil type has a higher hazard of soil blowing. The lessee will mitigate impacts to soil blowing with continuous cropping practices. The onsite inspection of this tract showed no salinity present in the topsoil profile. The 127.2 acres requested for breaking will maintain current soil qualities and soil stability under dryland agriculture management.</p> <p>Mitigation: There will be no need for a supplemental lease agreement with the lessee. The surface lessee plans to continuous crop this acreage. The annual standing stubble will mitigate any type of soil loss from wind erosion on the Manning coarse sandy loam.</p>
<p>5. WATER QUALITY, QUANTITY AND DISTRIBUTION: Are important surface or groundwater resources present? Is there potential for violation of ambient water quality standards, drinking water maximum contaminant levels, or degradation of water quality?</p>	<p>No Action Alternative: Under this alternative annual precipitation will be utilized by the crested wheatgrass plant community. There will be no impacts to water quality, quantity and distribution.</p> <p>Action Alternative: The project will allow the surface lessee to expand his dryland agriculture small grain and pulse crop production. The land breaking for small grain and pulse crops will not use water resources, other than the water associated with the topsoil from annual precipitation.</p>
<p>6. AIR QUALITY: Will pollutants or particulate be produced? Is the project influenced by air quality regulations or zones (Class I airshed)?</p>	<p>No Action Alternative: No impacts will occur to air quality under this alternative.</p> <p>Action Alternative: The breaking of the crested wheatgrass acreage for dryland agriculture purposes will have no impacts to the air quality of the State land.</p>
<p>7. VEGETATION COVER, QUANTITY AND QUALITY: Will vegetative communities be permanently altered? Are any rare plants or cover types present?</p>	<p>No Action Alternative: Under this alternative the current crested wheatgrass plant community will remain intact.</p> <p>Action Alternative: The breaking of the crested wheatgrass plant community will permanently destroy the current plant community on the project area. The crested wheatgrass community consisting of tame grass conservation reserve</p>

II. IMPACTS ON THE PHYSICAL ENVIRONMENT	
	program acreage contains no known rare plant species. This plant community is currently crested wheatgrass.
8. TERRESTRIAL, AVIAN AND AQUATIC LIFE AND HABITATS: Is there substantial use of the area by important wildlife, birds or fish?	<p>No Action Alternative: The habitat types associated with a crested wheatgrass plant community will remain intact.</p> <p>Action Alternative: This type of activity will disturb the habitat types on the State land. The area of impact is a crested wheatgrass plant community. This type of tame grass plant community has limited habitat resources. There will be minimal impacts to the wildlife and upland bird resources associated with the State land. There will be some areas of tract that will continue to produce a tame grass/native plant community. The remaining native plant community will provide some habitat resources for song birds, upland game birds, waterfowl, and whitetail deer. Montana Fish Wildlife and Parks were asked for their comments concerning this proposal. Mark Sullivan Regional Wildlife Manager from Fish Wildlife &amp; Parks made the on-site inspection of the State land. The following written statement from Mark Sullivan Region 6 Wildlife Program Manager concerning this project was submitted for the environmental assessment process: "I am writing to comment on the request to break Conservation Reserve Program acreage on State Land in Sheridan County. MFWP is generally opposed to breaking any ground in the vicinity of wetlands. The 90 acres of CRP within section 28 are within the several ephemeral wetlands and permanent riparian areas of the Big Muddy Creek. However, after a field review visit by MFWP biologist Drew Henry to the locations listed above, we can concur that these stands of CRP are heavily dominated by crested wheatgrass and smooth brome grass. Given the poor grass and forb composition, in combination with the relatively small size of the parcels, breaking the land would not likely be detrimental to the wildlife in the area. Montana Fish Wildlife and Parks is not opposed to breaking the describe lands".</p>
9. UNIQUE, ENDANGERED, FRAGILE OR LIMITED ENVIRONMENTAL RESOURCES: Are any federally listed threatened or endangered species or identified habitat present? Any wetlands? Sensitive Species or Species of special concern?	<p>No Action Alternative: Under this alternative there will be no change to the current environmental resources of crested wheatgrass/smooth brome grass pasture lands.</p> <p>Action Alternative: The project area contains no known unique, endangered, fragile or limited environmental resources. The project area consists of flat to gently rolling terrain, with crested wheatgrass vegetation/smooth brome grass. There are small areas of native rangeland located on portions of these tracts. These areas will be left in permanent vegetation.</p>
10. HISTORICAL AND ARCHAEOLOGICAL SITES: Are any historical, archaeological or paleontological resources present?	<p>No Action Alternative: The project area has no known historical or archaeological sites and existing status would remain.</p> <p>Action Alternative: There are no known historical or archaeological sites on the project area that will be impacted. The project area was inspected by Glasgow Unit Office</p>

II. IMPACTS ON THE PHYSICAL ENVIRONMENT	
	personnel for archaeological, historical and paleontological resources. There were no historical or archaeological sites identified during the on-site inspection.
11. AESTHETICS: Is the project on a prominent topographic feature? Will it be visible from populated or scenic areas? Will there be excessive noise or light?	<p>No Action Alternative: There would be no impacts that would occur to the aesthetic values associated with the State land under this alternative.</p> <p>Action Alternative: The project site is located in a rural area and is visible to the general public from a rural State highway. The project will have no impacts to the aesthetic values associated with the State land involved with this project or other surrounding lands. The aesthetic values of this area for the most part are dryland agriculture producing small grain and pulse crops. There are some scattered tame grass/native rangelands in the vicinity of the project site.</p>
12. DEMANDS ON ENVIRONMENTAL RESOURCES OF LAND, WATER, AIR OR ENERGY: Will the project use resources that are limited in the area? Are there other activities nearby that will affect the project?	<p>No Action Alternative: There will be no demands on environmental resources of land, water, air or energy occurring under this alternative.</p> <p>Action Alternative: The project will place no demands on environmental resources of land, water, air or energy. The nearby activities occurring on surrounding lands are the tillage of dryland agriculture acreage for the production of small grain and pulse crops. There are some scattered areas where livestock grazing occurs.</p>
13. OTHER ENVIRONMENTAL DOCUMENTS PERTINENT TO THE AREA: Are there other studies, plans or projects on this tract?	<p>No Action Alternative: Under this alternative there would be no changes to existing plans, studies or projects that the Department of Natural Resources and Conservation may have occurring on the State land.</p> <p>Action Alternative: The breaking of the crested wheatgrass/smooth brome grass vegetation will not impact other projects or plans that the Department of Natural Resources and Conservation may have occurring on this tract of State land.</p>

III. IMPACTS ON THE HUMAN POPULATION	
RESOURCE	POTENTIAL IMPACTS AND MITIGATION MEASURES
14. HUMAN HEALTH AND SAFETY: Will this project add to health and safety risks in the area?	<p>No Action Alternative: No human health or safety risks would occur under this alternative.</p> <p>Action Alternative: The breaking of crested wheatgrass/brome grass vegetation for dryland small grain or pulse crop production has minimal human health or safety risks.</p>
15. INDUSTRIAL, COMMERCIAL AND AGRICULTURAL ACTIVITIES AND PRODUCTION: Will the project add to or alter these activities?	<p>No Action Alternative: Under this alternative there will be no changes to current agriculture activities.</p> <p>Action Alternative: The project will enhance the surface lessee's ability to produce small grain and pulse crops on his State land lease. The production of dryland small grain and pulse</p>

	crops will also enhance the revenue generated for the School Trust.
16. QUANTITY AND DISTRIBUTION OF EMPLOYMENT: Will the project create, move or eliminate jobs? If so, estimated number.	<p>No Action Alternative: There will be no impacts to quantity and distribution of employment.</p> <p>Action Alternative: The project will not impact the quantity and distribution of employment. The land breaking will be accomplished by the surface lessee and no other labor force will be hired.</p>
17. LOCAL AND STATE TAX BASE AND TAX REVENUES: Will the project create or eliminate tax revenue?	<p>No Action Alternative: No local and state tax base and tax revenues would be impacted under this alternative.</p> <p>Action Alternative: The project will have no impacts on the local or state tax base.</p>
18. DEMAND FOR GOVERNMENT SERVICES: Will substantial traffic be added to existing roads? Will other services (fire protection, police, schools, etc) be needed?	<p>No Action Alternative: Under this alternative there will be no demands for government services.</p> <p>Action Alternative: The project will place no demands for government services.</p>
19. LOCALLY ADOPTED ENVIRONMENTAL PLANS AND GOALS: Are there State, County, City, USFS, BLM, Tribal, etc. zoning or management plans in effect?	<p>No Action Alternative: No impacts would occur to the locally adopted environmental plans or goals under this alternative.</p> <p>Action Alternative; The project will not impact locally adopted environmental plans and goals. The United States Department of Agriculture agencies (Farm Service Agency, Natural Resources and Conservation Service) will review this land breaking request by our lessee. The writer of this document envisions that they will approve of the land breaking request with there specific management plan of operation.</p>
20. ACCESS TO AND QUALITY OF RECREATIONAL AND WILDERNESS ACTIVITIES: Are wilderness or recreational areas nearby or accessed through this tract? Is there recreational potential within the tract?	<p>No Action Alternative: No impacts would occur to access and quality of recreation associated with the State land under this alternative.</p> <p>Action Alternative: The project area has minimal recreational values (upland bird hunting) in its current status. The land breaking project will have minimal impacts to the recreational values associated with these tracts of state land. There will be no impacts to recreational values on other bordering lands.</p>
21. DENSITY AND DISTRIBUTION OF POPULATION AND HOUSING: Will the project add to the population and require additional housing?	<p>No Action Alternative: No impacts will occur to density and distribution of population and housing under this alternative.</p> <p>Action Alternative: The project will not impact the density and distribution of the population and housing on this rural area.</p>
22. SOCIAL STRUCTURES AND MORES: Is some disruption of native or traditional lifestyles or communities possible?	<p>No Action Alternative; No impacts will occur to native or traditional lifestyles or communities under this alternative.</p> <p>Action Alternative: The project will not impact the social structures of the local communities. The city of Plentywood Montana is located one half mile northwest of the project location. The city of Plentywood Montana will not be impacted by this project.</p>

23. CULTURAL UNIQUENESS AND DIVERSITY: Will the action cause a shift in some unique quality of the area?	<p>No Action Alternative: No impacts will occur to the cultural uniqueness and diversity under this alternative.</p> <p>Action Alternative: The project will not impact the cultural uniqueness and diversity of the State land.</p>
24. OTHER APPROPRIATE SOCIAL AND ECONOMIC CIRCUMSTANCES:	<p>No Action Alternative: Under this alternative there will be no social or economic impacts that would occur</p> <p>Action Alternative: The cumulative affects of this project provides economic benefit to the surface lessee and the Department of Natural Resources and Conservation School Trust Fund. The dryland agriculture acreage on the State land will increase lessee's annual revenue from his State land lease holdings. The Department of Natural Resources will see additional revenue generated from this tract of State land for the School Trust.</p>

EA Checklist Prepared By:                     \S\                     Date:                     

Randy Dirkson                      Land Use Specialist

IV. FINDING	
25. ALTERNATIVE SELECTED:	<p>No Action Alternative: The no action alternative; was not selected by the Glasgow Unit Office, Unit Manager.</p> <p>Action Alternative: Grant written permission to surface lessees Brian and Martie Simonson to break and estimated 127.2 acres of crested wheatgrass/smooth brome grass vegetation located on these tracts of State land. The 127.2 acres will then be converted to dryland agriculture for small grain and pulse crop production.</p>
26. SIGNIFICANCE OF POTENTIAL IMPACTS:	<p>Action Alternative: The project will enhance the natural resources capabilities to produce dryland small grain and pulse crops on the State land. The land breaking project will increase revenue for the surface lessee and the State of Montana School Trust.</p>
27. Need for Further Environmental Analysis: <div style="display: flex; justify-content: space-between; margin-top: 10px;"> <span>[    ] EIS</span> <span>[    ] More Detailed EA</span> <span>[ X ] No Further Analysis</span> </div>
